## Installation

\* The cone safety lights are inserted from the top, using a rubber collar for increased grip, to fit entry holes from 28mm up to 46mm in diameter.

\* To secure the light in a tamperproof position there is a security disk which can be fitted from the underside.

## Universal Fit

Fully compatible with the majority of traffic cones including:

Starlite Cones 750mm  
Mastercone 750mm  
Econe 750mm

## V2 Performance

### Maximum Visibility - Zero Compromise

The new V2 PCB delivers a 40% increase in total illumination. By optimising light distribution across a wider arc, we have eliminated narrow beams in favour of superior localised clarity.

### Consistent Performance

Forget the "dimming effect" of traditional battery-powered units. Our integrated Battery Boost technology ensures:

- Uniform Output: High-intensity brightness maintained throughout the entire operating cycle.
- Total Reliability: No fading performance as batteries deplete.
- Safety Assurance: Elimination of dangerous "grey areas" caused by failing light levels.

### Brighter Illumination with New Motion Mode

Now equipped with additional LEDs for greater brightness, plus a new motion-sequencing mode for enhanced performance and visual effect. The 360 degree lenses provide flashing visibility for up to 925 hours.

### Low-Battery Indicator

The light gently flickers when the batteries are running low, letting you know it's time to replace them.
