WARRANTY**

Installation

Available in amber, red, or white lenses.

This right-angle safety light is designed for versatile installation and can be securely mounted to all types of scaffolding as well as a wide range of construction equipment using its adaptable mounting bracket.

By removing half of the bracket, the unit can also be directly screwed or bolted onto flat surfaces, providing additional installation flexibility.

Versatility

Durable Safety Lights for Scaffolding and Construction Areas

Engineered for demanding job sites, these safety lights feature a robust, impact-resistant design built to withstand harsh environmental conditions.

Ideal for use on barriers, skip lugs, scaffolding, and Heras fencing, they provide reliable visibility and enhanced site safety across a wide range of applications.

Performance

Improved Battery Performance

A new battery boost feature optimizes power use, helping the light stay brighter for longer and reducing dimming over time.

Brighter Illumination with New Motion Mode

Now equipped with additional LEDs for greater brightness, plus a new motion-sequencing mode for enhanced performance and visual effect. The 360 degree amber lenses provide flashing visibility for up to 1500 hours.

Low-Battery Indicator

The light gently flickers when the batteries are running low, letting you know it's time to replace them.
